New York, New York

Earn your CIOP designation while mastering underlying business concepts and cutting edge techniques in reducing costs, improving service, and achieving profitable growth

The Designation

Pathway to Excellence

To further advance their organization's capabilities and performance, today's insurance leaders and professionals must be able to accomplish more than they have ever done before. They need to build operations that are nimble and resilient. They need to design and deploy innovative processes that not only reduce costs but clearly differentiate the business by delivering a consistent and compelling customer experience. New metrics are needed that are forward looking, point to root causes of performance opportunities, and better enable accurate and timely decisions – at all levels of the organization. They need to better identify and rapidly implement high impact technologies that truly re-invent, enable, and bring about new modes of doing business. Multiple projects must be more effectively managed and collectively coordinated. They must reposition and optimize the return on human capital while creating a business context that inspires people, reorients their thinking, eliminates entitlement and creates personal and organizational accountability. Above all else they need to master the underlying bodies of knowledge and emerging business techniques that serve to optimize these operational elements while continually forging higher degrees of alignment and integration among these elements.

The Chartered Insurance Operations Professional (CIOP) designation process helps provide a pathway for insurance industry leaders and professionals to meet head-on the challenges associated with significantly improving and advancing the operational capabilities of their firms. The CIOP designation does this through a rigorous belief in the power of knowledge as a shaper of performance, a builder of professionalism, a creator of ideas, and an inciter of innovation and change.

Who Should Participate The CIOP designation and conference is specifically designed for those who are focused upon contributing to improving the operational capabilities and performance of their firms. Recognizing that operational effectiveness and efficiency is dependent upon optimizing a wide range of critical disciplines, and forging tighter integration among these disciplines, CIOP candidates comprise a diverse group of talented leaders and professionals including:

- | | |
|---|---|
| :: Senior managers and operating executives | :: Change sponsors, leaders and change agents |
| :: Process designers and process owners | :: Technology executives and professionals |
| :: Division executives and managers | :: Financial operations staff |
| :: Project managers, program office members | :: Quality managers, customer service advocates |
| :: Business unit leaders, product line managers | :: Human resource professionals |
| :: Strategic and operational planners | :: Internal consultants, business analysts |
| :: Organizational development practitioners | :: Team leaders and executive coaches |

The Process

The Chartered Insurance Operations Professional (CIOP) Designation Process

The CIOP Designation provides candidates both a valuable and rigorous learning experience and the opportunity to attain and convey a certified level of recognized mastery throughout the Insurance Industry. The CIOP Designation process involves four concise steps:

Step 1 – CIOP Designation Application: Each candidate completes and submits a CIOP Candidate Application & Registration Form as contained within this brochure. Candidates will be contacted by the CIOP Institute to review the applicant's qualifications, industry experience and current responsibilities.

Step 2 – Pre-CIOP Designation Conference Preparation: A few weeks prior to the CIOP Designation Class, candidates will be provided a package of articles and topical notes for their review.

Step 3 – CIOP Designation Conference Participation: Candidates participate in a two and a half day conference which covers the fundamental bodies of knowledge, contemporary tools and techniques, and illustrative case studies drawn from actual company situations -- covering all the key elements associated with building and sustaining highly effective and efficient contemporary insurance operations.

Step 4 – Completion of the post CIOP Designation Conference Exam Project:

Appreciating the importance of reinforcing the content of the designation class, participants are provided a take-away exercise that enables candidates the opportunity to summarize and review the key conference learning points. The assignment is intended to be completed by the candidates with approximately 4-6 hours of additional effort and will subsequently serve as a useful quick reference guide. Successful submission of the post conference Exam Project results in the awarding of the CIOP Designation.

For additional information or assistance regarding the CIOP Designation or Designation Class arrangements, please do not hesitate to contact the CIOP Institute at 1-866-930-CIOP or access www.CIOPDesignation.com

"We are excited about the CIOP course of study. The content is pertinent and comprehensive. It elevates our discipline and gives us a track for the ongoing development of ourselves as leaders and our staff. We have enrolled an additional three of our colleagues for the next CIOP Designee Class. We want our management to draw from a well-filled tool chest. We also see this as a powerful driver of culture – the right things getting done, the right way at the right time."

- Senior Vice President
AON Insurance Services

The Class

The CIOP Designation Class Syllabus The CIOP Designation Class provides an intense two and a half day content rich presentation of the key underlying concepts and cutting edge techniques in designing, building, engaging and sustaining high performance insurance operations. Given the amount of information that is presented, and the respective knowledge to be gained by CIOP candidates, the teaching approach is particularly rigorous, interactive and dynamic. Topics that comprise the CIOP Designation Class include:

Operational Modeling and Analysis

- :: Designing Effective Organizations & Operations
- :: Choosing the Proper Operational Elements
- :: Operational Planning and Deployment
- :: Organizational and Operational Architecture
- :: Normative and Contingent Models
- :: Designing the Customer Experience Focused Operation
- :: Strategy, Structure & Process Mix
- :: Developing Operations: Diagnosis and Action
- :: Creating an Operational Platform for Sustained Performance
- :: Designing Costs Out of Insurance Operations
- :: Lean Manufacturing and Insurance Service Delivery

Process Principals and Design Techniques

- :: Insurance Process Design Principals and Best Practices
- :: Increasing Quality and Consistency While Reducing Costs and Time
- :: Current Process Assessment, Analysis and Calibration
- :: Aligning Processes Around Customers and Desired Business Outcomes
- :: Defining Process Governance, Process Ownership and Accountabilities
- :: From Reengineering, Through Six Sigma, and Process Modeling
- :: Process Enablers Versus Process Anchors
- :: Process Decomposition, Synthesis, Experimentation and Innovation
- :: Insurance Data Modeling and Use Case Scenario Analysis
- :: The Insurance Process Design Framework

Advancing Operational Performance through Metrics

- :: The New Metrics – Characteristics and Contrasts
- :: Measurement Frameworks – From Balanced Scorecards to Cascading Frameworks
- :: Metrics that Highlight Business Performance Drivers
- :: Designing and Implementing Insurance Dashboards
- :: Creating High-Impact Measurement Presentations and Displays
- :: The Power and Potential Pitfalls of a Balanced Scorecard
- :: Shaping Behavior and Infusing Accountabilities through Metrics
- :: Fact-based Decision Making and Root Cause Drill-Down's
- :: New Ways of Measuring and Predicting Customer Satisfaction
- :: Future Trends in Metrics: Creating Rule Based Measurements For Insurance Operations

Technology Enabled High Performing Operations

- :: Integrating Technology, Process and People – Best Practices
- :: Emerging Technologies that Will Shape Future Insurance Operations
- :: The Insurance Service Factory: Concepts and Technologies
- :: The Strategic Approach to Outsourcing – Leveraging Global Capabilities
- :: Turbo-charging Service Delivery Channels – Service Center Best Practices
- :: Developments in Project and Program Management
- :: Insurance Technology Delivery Framework Templates and Project Accelerators
- :: Linking Technology and Operational Innovations in Gaining Breakthrough Performance

Leveraging Human Capital for Sustainable Operational Excellence

- :: Expanding the Knowledge, Expertise, and Dedication of the Workforce
- :: Socio-Technical Systems – Aligning People and Work Systems
- :: Building Improved Accountability – Managing the Five Levels of Accountability
- :: Building High Performing Teams – From Group Dynamics to Self Directing
- :: Organizational Culture, Leadership, Values and Beliefs
- :: Acquiring, Developing, Retaining, and Positioning Talent
- :: Emotional Intelligence Concepts and Applications Within Insurance Operations
- :: High Performing Job Design Strategies, Human Capital Indexing, and Reward Systems
- :: Problem Solving and Decision Making – Methods, Techniques and Style

Managing Change – Planning and Mobilizing For Improved Insurance Operations

- :: The Ability to Change as a Competitive Advantage
- :: Integrated Models and Techniques for Operational Innovation and Change
- :: Understanding and Overcoming Resistance
- :: Defining and Executing an Effective Change Program
- :: Assessing Change Readiness – Setting the Conditions for Successful Change
- :: Creating a Tipping Point – Connectors, Mavens and Salesmen
- :: Institutionalizing Change and Harvesting Operational Benefits

CIOP Tuition & Designation Class Registration Fees

The CIOP tuition for those applying and registering through March 30th is \$1,850. After March 30th the tuition is \$1,950. Recognizing that a unified, collaborative and well trained team contributes to operational success, insurance organizations have the option of sponsoring team attendance. Under these circumstances, a team discount of 10% for 3 or more participants will be applied.

The CIOP Designation Class will be held April 13 - 15, 2011 at the American Management Association Executive Conference Center, 1601 Broadway in New York City. Sessions will be conducted from 8:30 AM to 5:PM on Wed., April 13th and Thurs., April 14th. The Friday, April 15th session will begin at 9:AM and conclude at noon to facilitate afternoon travel. Hotel information is available on the CIOP Institute web site www.CIOPDesignation.com.

Designing, Building and Leading World Class Insurance Operations

Earn your CIOP Designation while mastering underlying business concepts, proven techniques, and powerful tools in reducing costs, improving service, and achieving profitable growth.

- Modeling, developing, and deploying a high performance operations strategy
- Driving operational excellence through new scorecards and metrics
- Competing on Analytics – Leveraging operational data in gaining speed and precision
- Insurance operations that deliver unparalleled customer experience
- Consistently delivering world class service and building competitive advantage
- Operations that give traction to business strategy, product development, and compliance
- Technology enabled operational excellence: The emerging technologies that will shape insurance operations of the future
- Turbo-charging insurance operations, service delivery and call centers
- New frontiers on managing change – Building accountability throughout the organization
- New process design techniques to gain operational speed and flexibility
- Lean operational manufacturing disciplines that cut costs while contributing to premium growth
- Create, develop, and execute an operational human capital strategy and talent program
- Case Studies – How insurance firms attain breakthroughs in costs, quality, speed, growth and customer satisfaction

Given the significant amount of content to cover and knowledge to convey, the CIOP process and instructional approach is rigorous, interactive and dynamic.

CIOP faculty members cover topics in a variety of ways using a range of media. Each topic is fully explored and addressed by way of underlying concepts and how these concepts bear significance to insurance operations. Presentation of course content is further expanded upon through the use of actual insurance industry examples and case studies. As such, the entire CIOP Designation and learning experience is intensely pragmatic and of immediate relevance and value to CIOP candidates.

CIOP Designation Classes are designed to support a limited number of candidates to avoid compromising the quality of the program; ensure the proper participant profile; and enable the greatest degree of interactive learning. Potential CIOP candidates are reminded that the CIOP process is not geared to a huge audience. This is a highly interactive, intense, development program specifically designed to advance the level of knowledge, skill, and respective recognition of insurance professionals dedicated to improving insurance operations.

“To the authors and creators of CIOP...thanks. The class curriculum was well thought out and organized. The speakers/instructors were superb. The follow up test and exercise were practical, timely and rewarding for our organization. Just the few things we’ve done since attending the class will generate over a half a million dollars. What a great investment for our organization.”
